Forecast for Friday 28 Jul 2023

Weather: A cloudy start, especially across western areas where outbreaks of drizzle likely. Cloud lifting and breaking to give a brighter afternoon with sunny spells. A few well-scattered showers likely during the afternoon and evening. These are expected to be mostly light, however the odd heavier burst possible late on and overnight.

Chance of cloud-free hill tops above 600m: 40% in the west, increasing 80% by late-morning. 90% in the east.

Low cloud and visibility: Banks of cloud affecting mainly western slopes initially, bases around 500-600m. This becoming patchier through the morning to leave cloud free tops. Chance of tops becoming obscured in showers, mainly later in the day and overnight. Visibility poor or very poor in early drizzle, otherwise good or very good, even in any light showers.

Forecast for Saturday 29 Jul 2023

Weather: A changeable day across the Peaks with scattered showers interspersed with some lengthy sunny and dry spells. Some showers may merge to give more prolonged rainfall at times, perhaps turning heavy and thundery late on.

Maximum wind: Southwest 15-20mph with gusts of 25-35mph.

Chance of cloud-free hill tops above 600m: 80% or above throughout.

Low cloud and visibility: Some patches of mist and fog may form in the early hours, briefly shrouding summits as it lifts and clears. Otherwise, cloud bases are expected to remain above the hills. Chance of lowering in heavier showers late on to around 600m.Visibility mostly very good, perhaps moderate in showers. Poor or very poor in any early mist or fog.

Temperature: **Valleys:** Plus 12 Celsius rising to Plus 18 Celsius
At 600m: Plus 10 Celsius rising to Plus 16 Celsius
Freezing level: Well above summits.
